Note: Neonatal mortality refers to the death of a liveborn infant, occurring up to the 27th completed day of life (27 days, 23 hours and 59 minutes). Postneonatal mortality denotes the death of a liveborn infant weighing 500 g or more at birth, occurring from 28 days to 1 year of life. Infant mortality encompasses both neonatal and postneonatal mortality, that is, the death of a liveborn infant occurring within the first year of life.
