<sup>a</sup> Sex could not be determined in some infants and these infants are not included in some categories.

Note: Stillbirth refers to the complete expulsion or extraction from its mother after at least 20 weeks pregnancy, or after attaining a weight of 500 g or more, of a fetus in whom, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle. Early neonatal mortality refers to the death of a liveborn infant, occurring up to the sixth completed day of life (6 days, 23 hours and 59 minutes). Perinatal mortality includes both stillbirths and early neonatal deaths.
